

About security and fundamental rights

Key question: how to ensure security while maintaining due process, freedom of expression and privacy in a global environment?

- **Cybercrime/threats to cybersecurity are for real**
- **Coping with cybercrime:**
 - **(1) prevention, (2) protection/information security, (3) enforcement/criminal justice**
 - **Criminal justice and law enforcement**
 - **Shared responsibility on the basis of agreed upon standards/principles/guidelines/”Code”**
- **Data protection/privacy: need for global trusted data protection/privacy policies**
- **Freedom of expression, due process/procedural safeguards and other fundamental rights - CIA as a basic right - Towards common standards/regulations/code**
- **Security AND fundamental rights: Need for global capacity building effort**
- **“Exploiting opportunities by all”**
